

Security and data overview

How asasii property handles identity, audit, purchaser data and continuity.

Identity and access

Single sign-on	With the developer's own identity provider
Multi-factor authentication	Required on every console
Roles	Scoped by development and function

Audit

What is recorded	Every action, with the previous value
Retention	Seven years
On every purchaser	The booking, the agreement, the financing position and every communication since, on one record

Where the data lives

Environment	The developer's own cloud account or data centre
Ownership	The developer owns the records; the developer's team holds the keys, the backups and the data
Maintenance	idataraya installs the system, hardens it and keeps it current
At handover	Purchaser details carry across rather than being re-entered

Personal data

Purchaser data	Stay in the developer's own environment, under the Personal Data Protection Act 2010
Export	Every record exports on request

Continuity

Backup	A drilled backup and restore
Monitoring	Continuous, from within the developer's environment
Response	Severity-based response times, measured monthly

Integration

API	Documented, for units, bookings and purchaser records
-----	---
